mentioned above.

- (3) This is the first report that mines were planted along the western border of Czechoslovakia. Previous rumors to this effect have not been verified. It is probable that mines were laid in the As area, since a previous report on the storing of mines in Novazdar and Medesa in November 1949 quoted an engineer officer as saying that these mines were to be planted in the border area. See 
- (4) It has been known for a long time that SDB units were reinforced by army personnel. It is believed, however, that the army personnel were only detached to the SDB for temporary assignment to border duty.
